1. Purpose:

This document presents findings referring to the tests done on the website of the “Domino’s Pizza” chain in Israel. The tests were carried out on the main functions of the site, which refer to operations such as: navigation and displaying the menu, placing an order, registering on the site, using various features, reading information about the restaurant, etc.

3.Conclusions:

Following the various tests done on the “Dominos Pizza” website, quite a few bugs were found. Most of them have a degree of severity between low and major.

So, despite the relatively large amount of bugs, the website still functions reasonably well and performs its main functions, which are viewing the restaurant menu and ordering delivery to the customer’s home / self-collection.

As a result, I recommended releasing the site.

Below the navigation bar, there's a section for delivery services, including "Click & Collect" and "Delivery". The main content area features a form for selecting a delivery location. The form has a title "משלוח" (Delivery) and a subtitle "תוך 30 דקות" (Within 30 minutes). Below the title, there's a checkbox labeled "הראו לי רק סניפים כשרים למחר" (Show me only kosher branches for tomorrow). The form contains several input fields for location details: "עיר" (City), "רחוב" (Street), "מספר בית" (House number), "קריית" (Neighborhood), and "קריית שמואל" (Kiryat Shmuel). There are also buttons for "המשך" (Continue) and "למשלוח עתיד" (Future delivery). The background of the website shows a Domino's pizza.
